IUPUI School of Science Statement on Research Centers/Institutes

Effective Date: *July 1, 2013*

Research Centers/Institutes within the School of Science serve to facilitate productive, synergistic, and often inter-disciplinary faculty interactions to promote the teaching and research missions of the school. It is expected that such activities will lead to collaborative grant applications and peer-reviewed publications. The Directors of active Centers/Institutes (where the director is an SOS faculty member or significant activity of the Center/Institute involves SOS faculty or where the SOS has committed resources to the Center/Institute) will provide an annual report to the SOS Associate Dean of Research and Graduate Education that summarizes the Center's budget (if applicable) and activities. The School of Science will maintain a current listing and description of all approved Centers/Institutes on its web page.
